

ANTI SMOKE

DIESEL SYSTEM CLEANER ADDITIVE

DESCRIPTION

Professional product developed to cure and prevent exhaust smoke and soot formation in diesel vehicles. Reduces fuel consumption. Helps to protect the environment. Immediate action.

BASIC BENEFITS

- Helps and prevents smoke and CO2 emissions.
- Prevents pollution.
- Protects the inlet and EGR system against pollution.

PROPERTIES

- More even engine idle speed, less noise and vibration
- Lower fuel consumption
- Immediate action and result
- Prevents deposits in the EGR system
- Prevents deposits in catalyts and particulate filters.

APPLICATION

Add the entire bottle (300 ml) to the fuel before refueling. (1 bottle per 40 to 60L of fuel). Suitable for all diesel engines.

TYPICALS

Aggregation state: Liquid

Colour: light brown

Odour: characteristic

Flash point: > 60 °C

Self-ignition: > 200°C

Density: 0.8 < 0.9 kg/l

Lower explosion limit: 0.6 % Vol.

Upper explosion limit: 7%.

PACKAGING

300 ml can (12 x 300 ml/carton)
