

ECO FUEL

MULTIFUNCTIONAL FUEL ADDITIVE

DESCRIPTION

Multifunctional fuel (diesel and petrol) additive. Improves fuel injection and general performance of engines and exhaust treatment systems.

BASIC BENEFITS

- Smooth and proper engine running, less noise and vibrations.
- Greater fuel economy.
- Increased power and engine dynamics.
- Improved engine reliability.
- Reduced toxic emissions and smoke.

PROPERTIES

- Cleans and lubricates injectors and fuel systems.
- Keeps the EGR and DPF/GPF systems clean.
- Neutralizes water in the fuel tank.
- Protects the fuel system from corrosion.
- Protects distributor injector pumps from wear.
- Prevents seizing and the injectors needles from resinifying.
- Protects the fuel from oxidation and degradation.

APPLICATION

Use for preventive treatment. Suitable for all engines including the latest generation directly injected with EGR, Particle Filter and catalyser.

Recommendation:

For further maintenance of the improved condition is recommended the Diesel Multi Conditioner fuel additive (ref: 3185250) or Petrol Multi Conditioner (ref: 3178250) for every day use.

DIRECTIONS OF USE

Add one can to fuel before filling. Mix 250 ml with a maximum of 70 litres of fuel.

TYPICALS

Physical state	Liquid
Colour	Amber
Boiling point	190 °C
Flash point	63 °C
Ignition temperature	205 °C
Pour point	-33 °C
Density at 20 °C	0,796

PACKAGING

250 ml can (12 x 250 ml carton)
