

ULTIMAX PETROL

ULTIMATE MULTIFUNCTIONAL PETROL FUEL CONDITIONER

DESCRIPTION

Ultimate multifunctional petrol fuel additive. Specially designed for modern petrol engines including the latest generation high pressure directly injected (GDI, FSI & SIDI) for:

- Powerful cleaning of the fuel injection system.
- Improved combustion and Octane number boosting.
- Keep clean of the vanes of the turbo charger.

BASIC BENEFITS

- Greater fuel economy.
- Trouble-free functioning of the catalytic system.
- Smoother engine running.
- Increased power and dynamics.
- Reduction of smoke and CO2 emissions.
- Improved engine reliability.
- Protects the fuel system from corrosion.

PROPERTIES

- Cleans and protects injectors, valves and the entire fuel system intensively.
- Lubricates injection system and pumps.
- Protects injector pumps from wear.
- Protects the intake system and EGR-valve from deposits.
- Keeps the turbo and exhausts system clean.
- Higher octane number, leading to an improved combustion process increasing power output and fuel economy.
- Removes water from the fuel.
- Protects the fuel from oxidation and degradation.

APPLICATION

Use at regular service or when problems appear.

It is strongly recommended to clean the injection system at least once a year.

For all Petrol engines including the latest generation high pressure directly injected (GDI, FSI & SIDI). E10 fuel compatible.

DIRECTIONS FOR USE

Add to the petrol fuel before filling. One can (350ml) treats up to 70 litres of fuel.

TYPICALS

Physical state:	Liquid
Colour:	Amber
Boiling point (°C):	185
Flash Point (°C):	62
Ignition temp (°C):	200
Pour point (°C):	-44
Density @ 20°C:	0,923

PACKAGING

350 ml can (12 x 350 ml carton)
